

Symmetry

What is symmetry?

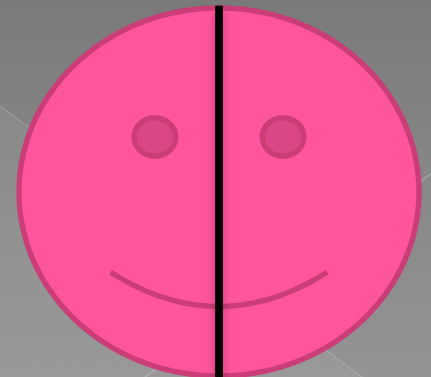

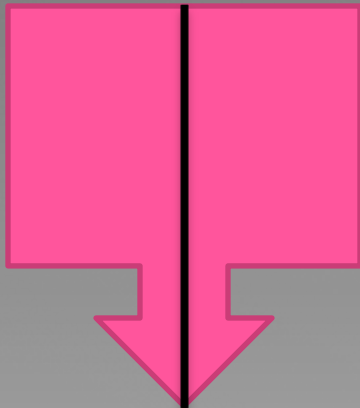

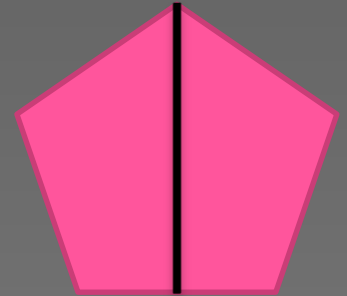

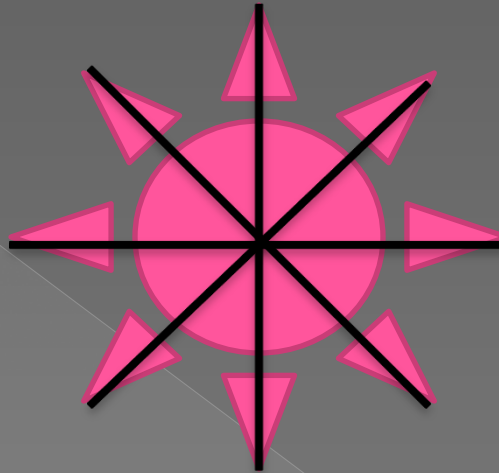

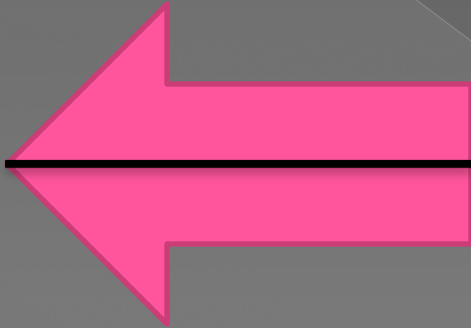

Symmetry is when an object is exactly alike when cut in half by an imaginary line.

You try it!

Where you correct?

Now we are going to split up into TWO groups.

- Group number ONE will practice symmetry on the Smart Board.
- Group number TWO is going to work on a work sheet.
- After 5-10 minutes you will switch.
- By the end of class each student will have completed their worksheet and turned it in.
